

ONLINE ENROLLMENT

With our **ONLINE ENROLLMENT** system, you are one step closer to completely automating your employee benefits program! Allow employees to access critical benefit information and make educated decisions while simplifying the enrollment process for employees and your HR group.

ONLINE ENROLLMENT can be used for open enrollment and/or for year-round eligibility transactions (new hires, life status changes, terminations, etc.). **ONLINE ENROLLMENT** also offers the following features:

- Seamless integration with your custom Employee Benefits Website to maintain your corporate identity
- Provides a census upload feature to pre-populate the system with demographic and benefit election information
- Payroll options are set up during implementation to calculate employees costs during the enrollment process
- Pre-programmed benefit calculator feature helps support complex benefits and allows employees to see their specific life and optional life benefits
- A paper version of your consolidated enrollment form is provided for employees who do not have computer access
- Employee Benefit Confirmation Statements are produced at the end of the enrollment for employees' records
- Multiple versions of the enrollment information are available
- At any time, all enrollment and eligibility data is available in Excel and CSV format for review, manipulation and easy carrier submission in spreadsheet format
- Enrollment information is securely managed through our HIPAA compliant client servers

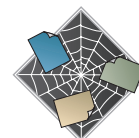

Most importantly...

***We do all of
the work!***

A case implementation specialist will set up your website along with your **ONLINE ENROLLMENT** and have it available in just a few short weeks. Call us today.
